

ME FRESHMAN ORIENTATION FOR 382

March 27, 2018

Freshman Orientation for Mechanical Engineering students was conducted on March 27, 2018 during Period-3 at the Tent Hall of Jubail University College. The main purpose of this annual meeting is to welcome freshman students and inform them about the Mechanical Engineering Degree Plan, Academic Advising and Co-curricular activities. The department also listens to questions, comments and suggestions of students. Dr. Ghassan, Assistant Professor of the Mechanical Engineering Department, gave the opening speech by congratulating the students for their achievements in joining Mechanical Engineering program. He briefed the students about the ME Degree Plan and Prerequisites to be taken for the courses. He said that Mechanical Engineers are in demand now, and projections for the future vision 2030 suggest a long-term need for professionals in this specialty. Also, he mentioned about some careers which students can take after graduation.

Dr. Maroof Morsheed, the Co-ordinator of Academic Advising for Mechanical Engineering, highlighted the importance and procedures for the academic advising. He also introduced the departmental academic advisory committee members to the students. Finally, during the open session students asked various questions regarding the Mechanical Engineering program to which ME faculty members answered to the satisfaction of the students.
