ASME Student Club Visit to Saudi Kayan Petrochemical Company

On Thursday 29th of December 2016, ASME Student Club visited Saudi Kayan Petrochemical Company. Saudi Kayan is an affiliate of Saudi Basic Industries Corporation (SABIC) and its petrochemical complex is one of the largest in the world and is located in the Jubail Industrial City. Saudi Kayan is producing Ethylene, Propylene, Polyethylene, Polypropylene, Ethylene Glycol, Acetone and other products.

The main purpose of the visit is to expose the students of Mechanical Engineering to activities in the industrial environment. Furthermore, students will be aware of new industrial technologies and application of some concepts they learned in the lecture rooms at JUC. The visit was part of the ASME (American Society of Mechanical Engineers) student club activities at Jubail University College.

The visit was successfully organized with the support of the Community Services Department and Saudi Kayan Workforce Development & Continuous Improvement Department. The students were accompanied by ASME coordinators Dr. Mohammed Imbaby and Dr. Maruf Morshed. The visit was supervised by Mr. Nizar Mansour, Mr. Nasser Al Baqami, Eng. Fares, Eng. Mohammed and Eng. Yousef. They enlightened the students about Industrial environments, Health and Safety, Maintenance and reliability. Also, the students visited the Mechanical Engineering Workshop and they were exposed to the various machines and equipment and they were very keen to observe the various Mechanical machine and it helped them understand of the fabrication of different products.
