## **ASME Student Club Visit to SABIC Technology Center.**

On Monday 20<sup>th</sup> of March 2017, ASME Club visited SABIC Technology Center. SABIC Technology Center located in Jubail Industrial city is one other center which is the main focus is to give support to all SABIC affiliate, it consists of many departments in which their main focus to enhance SABIC products and innovation.

The purpose of the visit is to expose the students of Mechanical Engineering to experience the technology research environment. The visit was part of the ASME (American Society of Mechanical Engineers) student club activates for 372 at Jubail University College.

The visit was successfully organized by ASME student club Chairman Mr. Abdulaziz Abanmi and with the support of the Community Services Department and SABIC Technology Center Workforce Development & Continuous Improvement Department. The students were accompanied by ASME coordinator Dr. Mohammed Imbaby. The visit was supervised by Dr. Abdullah Al Shahrani and Mr. Waleed Al Othman. They enlightened the students about technology research, SABIC Technology Center structure and departments. Also, the students visited the research labs and they were exposed to the various experiments processes and equipment. They were very keen to observe the various Mechanical Engineering testing and experiments and it helped them understand the role of Mechanical Engineer in the research field.
