ASME Student Club Visit to FABLAB.

On Monday 30Th of October 2017, ASME Club visited FabLab. FabLab is Located in AlFanater at Jubail Industrial City.

The purpose of the visit was to expose the students of Mechanical Engineering to experience the technology research environment. The visit was part of the ASME (American Society of Mechanical Engineers) student club activates for 381 at Jubail University College.

The visit was successfully organized by ASME student club Chairman Mr.Abdulkarim Muusa and, with the support of the Student Services Department and FabLab & Continuous Improvement Department. The students were accompanied by the Chairperson of the Mechanical Engineering Department Dr. Surajudeen Adewusi and, ASME Student Club coordinator Dr. Mohammed Imbaby and Mr. Mohammad Al Faris of Student Services Department. The visit was supervised by Mr. Husam Al-Zahrani. He enlightened the students about technology, research, FabLab structure and departments. Also, the students were exposed to various new technologies in production and manufacturing processes and equipment. Students were very keen to observe the various Mechanical Engineering machines and manufacturing techniques, and this helped them to better understand the concepts they learned at JUC and experience actual workplace and laboratory set-up.
